Unchurched Report

Survey of 2,000 Unchurched Americans

For the Billy Graham Center for Evangelism, Wheaton College
Methodology

- A demographically balanced online panel was used for interviewing American adults
- The study was sponsored by the Billy Graham Center for Evangelism at Wheaton College
- The survey was conducted May 23 – June 1, 2016
- Slight weights were used to balance gender, age, ethnicity, education, and region
- The sample was screened to only include those who have not attended a religious service in the past six months except for a holiday or special event such as a wedding or funeral
- The completed sample is 2,000 surveys
- The sample provides 95% confidence that the sampling error from the online panel does not exceed ±2.7% (This margin of error accounts for the effect of weighting)
- Margins of error are higher in sub-groups
Survey Responses
53% of unchurched individuals are male

Q1 “Are you male or female?”
Two thirds of unchurched individuals are white

Q2 “Which of the following best represents your race or ethnic group?”
The regional breakdown for unchurched individuals is similar to that of all Americans.

- Those age 18-24 (30%) are more likely to select “2-4” than those 45-54 (18%), 55-64 (19%), and 65+ (19%)
- Hispanics are the least likely to select “5-10” (14%)
- Those who with a Graduate degree (24%) are more likely to select “More than 20” than those who have are high school graduates or less (11%) or have some college (14%)
- Those with household income of $75,000-99,999 (26%) and $100,000 or more (26%) are more likely to select “5-10” than those with less than $25,000 (16%)
- Those with household income of $75,000-99,999 (21%) and $100,000 or more (20%) are more likely to select “More than 20” than those with less than $25,000 (9%) and $25,000-34,999 (8%)
- Those who are married (26%) are more likely to select “5-10” than those who are widowed (14%) or are in a civil union/domestic partnership (16%)
- Those that regularly attended a Christian church as a adult are more likely to select “More than 20” (22% v. 12%)
“Which of the following describes your feelings about the faith of your Christian friends?”

I put up with it

- Those age 18-24 (33%) are more likely to select than those 35-44 (19%), 45-54 (9%), 55-64 (14%), and 65+ (13%)
- Asian-Americans (27%) are more likely to select than Whites (16%)
- Those who are single, never married are the most likely to select (28%)
- Christians are the least likely to select (10%)
- Self-identified Evangelicals are less likely to select (4% v. 19%)
- Those that regularly attended a Christian church as a adult are less likely to select (9% v. 21%)
“Which of the following describes your feelings about the faith of your Christian friends?”

I admire it

- Those in the South (38%) are more likely to select than those in the Northeast (25%)
- African-Americans are the most likely to select (45%)
- Those who are high school graduates or less are the most likely to select (39%)
- Those with household income of less than $25,000 (40%) or $25,000-34,999 (45%) are more likely to select than those with $35,000-49,999 (28%), $50,000-74,999 (28%), and $100,000 or more (23%)
- Christians are the most likely to select (42%)
- Protestants (48%) are more likely to select than Catholics (35%)
- Self-identified Evangelicals are more likely to select (57% v. 31%)
- Those that have never attended a Christian church regularly are less likely to select (23% v. 35%)
- Those that regularly attended a Christian church as a adult are more likely to select (47% v. 28%)
“Which of the following describes your feelings about the faith of your Christian friends?” continued

I give them a hard time about it
- No significant differences

I ignore it
- Those age 25-34 (22%) are more likely to select than those 45-54 (11%) and 55-64 (8%)
- African-Americans are the least likely to select (4%)
- Those with a Graduate degree (26%) are more likely to select than those who are high school graduates or less (9%) or have some college (13%)
- Those who are single, never married (17%) are more likely to select than those who are widowed (4%)
- Nonreligious are the most likely to select (29%)
- Self-identified Evangelicals are less likely to select (<1% v. 14%)
- Those that regularly attended a Christian church as an adult are less likely to select (5% v. 16%)
“Which of the following describes your feelings about the faith of your Christian friends?”

continued

I share it

- Asian-Americans (22%) and African-Americans (25%) are more likely to select than Hispanics (8%) and Whites (13%)
- Those who are widowed (28%) are more likely to select than those who are married (16%), single, never married (11%), or divorced/separated (9%)
- Christians are the most likely to select (20%)
- Self-identified Evangelicals are more likely to select (37% v. 12%)
- Those that have never attended a Christian church regularly are less likely to select (6% v. 16%)
- Those that regularly attended a Christian church as an adult are more likely to select (24% v. 11%)
“Which of the following describes your feelings about the faith of your Christian friends?”

continued

I try to change it

• No significant differences
“My Christian friends talk about their faith too much.”

- Those in the West (27%) are more likely to Agree than those in the Northeast (16%)
- Those age 18-24 (28%), 25-34 (25%), 35-44 (27%), and 45-54 (24%) are more likely to Agree than those 65+ (13%)
- Asian-Americans (41%) are more likely to Agree than African-Americans (26%) and Whites (18%)
- Nonreligious are the most likely to Agree (29%)
“If a friend of mine really values their faith, I don’t mind them talking about it.”

- Those in the South (84%) are more likely to Agree than those in the West (73%)
- African-Americans are the most likely to Agree (88%)
- Those who are high school graduates or less are the most likely to Agree (84%)
- Those with household income of less than $25,000 (87%) are more likely to Agree than those with $25,000-34,999 (77%), $75,000-99,999 (76%), and $100,000 or more (69%)
- Those who are widowed (91%) are more likely to Agree than those who are married (77%), single, never married (79%), or divorced/separated (74%)
- Christians are the most likely to Agree (84%)
- Protestants (91%) are more likely to Agree than Catholics (74%)
- Self-identified Evangelicals are more likely to Agree (97% v. 77%)
- Those that have never attended a Christian church regularly are less likely to Agree (68% v. 81%)
- Those that regularly attended a Christian church as a adult are more likely to Agree (89% v. 75%)
“Which, if any, of the following would make you more interested in listening to what Christians had to say?”

I saw them caring for people’s needs because of their faith

- Those in the South are the most likely to select (38%)
- Christians (37%) are more likely to select than Nonreligious (22%)

- Those who are single, never married (33%) are more likely to select “Effective” than those who are widowed (20%)
- Christians are the most likely to select “Effective” (34%)
- Nonreligious are the least likely to select “Effective” (14%)
- Self-identified Evangelicals are more likely to select “Effective” (51% v. 27%)
“The Christian faith…”

Is not for people like me
- Those age 18-24 (23%) and 25-34 (26%) are more likely to select than those 45-54 (11%) and 55-64 (13%)
- Those with a Graduate degree (24%) are more likely to select than those who are high school graduates or less (13%)
- Those who are single, never married (22%) are more likely to select than those who are widowed (6%)
- Christians are the least likely to select (4%)
- Self-identified Evangelicals are less likely to select (<1% v. 18%)
- Those that regularly attended a Christian church as an adult are less likely to select (6% v. 20%)

Is against things I support
- Those age 18-24 (15%) are more likely to select than those 55-64 (5%) and 65+ (5%)
- Nonreligious are the most likely to select (17%)
“The Christian faith…”

Is good for society

- Those in the South are the most likely to select (52%)
- Those age 45-54 (49%) and 55-64 (51%) are more likely to select than those 18-24 (33%), 25-34 (32%), and 35-44 (36%)
- African-Americans are the most likely to select (52%)
- Those who are high school graduates or less (44%) or have some college (43%) are more likely to select than those with a Graduate degree (31%)
- Those who are married (46%), divorced/separated (47%), or widowed (52%) are more likely to select than those who are single, never married (34%) or in a civil union/domestic partnership (34%)
- Those with children are more likely to select (47% v. 35%)
- Christians are the most likely to select (60%)
- Protestants (69%) are more likely to select than Catholics (48%)
- Self-identified Evangelicals are more likely to select (81% v. 39%)
- Those that have never attended a Christian church regularly are less likely to select (20% v. 49%)
“The Christian faith...”

Is good for society (continued)
• Those that regularly attended a Christian church as a child are more likely to select (46% v. 34%)
• Those that regularly attended a Christian church as a teen are more likely to select (54% v. 36%)
• Those that regularly attended a Christian church as an adult are more likely to select (67% v. 34%)

Is harmful to society
• Nonreligious are the most likely to select (15%)
“The Christian faith…”

Is not something I know much about

- No significant differences

Is something I have never explored

- Those age 18-24 (14%) are more likely to select than those 55-64 (4%) and 65+ (4%)
- Asian-Americans (19%) are more likely to select than African-Americans (6%) and Whites (7%)
“How likely are you to attend church regularly sometime in the future?”

Percent selecting “Very likely” or “Somewhat likely”

- Those in the South are the most likely (40%)
- Those age 65+ are the least likely (21%)
- African-Americans are the most likely (59%)
- Those who are high school graduates or less are the most likely (41%), while those with a Graduate degree are least likely (15%)
- Those with household income of less than $25,000 (42%) are more likely than those with $35,000-49,999 (31%), $50,000-74,999 (28%), $75,000-99,999 (31%), and $100,000 or more (25%)
- Christians are the most likely (48%)
- Self-identified Evangelicals are the most likely (77% v. 31%)
- Those that have never attended a Christian church regularly are less likely to attend (16% v. 39%)
- Those that regularly attended a Christian church as a teen are more likely (44% v. 28%)
- Those that regularly attended a Christian church as an adult are more likely (57% v. 27%)
“Which, if any, of the following life experiences would make you more open to consider turning to the church for help?”

Getting married
- Those age 65+ are the least likely to select (2%)
- Those that regularly attended a Christian church as an adult are less likely to select (6% v. 20%)

Having kids
- No significant differences

Moving to a new area
- Those who are in a civil union/domestic partnership are the least likely to select (2%)
- Self-identified Evangelicals are more likely to select (25% v. 10%)
- Those that regularly attended a Christian church as an adult are more likely to select (21% v. 7%)
“Which, if any, of the following life experiences would make you more open to consider turning to the church for help?”

Facing a health crisis

- Those who are high school graduates or less (22%) are more likely to select than those with a Graduate degree (12%)
- Those with household income of $25,000-34,999 (24%) are more likely to select than those with $100,000 or more (14%)
- Christians are the most likely to select (26%)
- Those that have never attended a Christian church regularly are less likely to select (11% v. 22%)

“There are many beliefs about life after death. Which of the following statements is closest to your own beliefs?” continued

- Self-identified Evangelicals are less likely to select “After you die you will go to Heaven because you have tried your best to be a good person and live a good life” (6% v. 16%)
- Self-identified Evangelicals are more likely to select “After you die you will go to Heaven because you have received Jesus Christ as your savior” (75% v. 14%)
- Self-identified Evangelicals are less likely to select “No one really knows what will happen after we die” (9% v. 39%)
- Those that have never attended a Christian church regularly are less likely to select “After you die you will go to Heaven because you have received Jesus Christ as your savior” (6% v. 21%)
- Those that have never attended a Christian church regularly are more likely to select “No one really knows what will happen after we die” (45% v. 35%)
- Those that regularly attended a Christian church as a teen are more likely to select “After you die you will go to Heaven because you have received Jesus Christ as your savior” (26% v. 13%)
“There are many beliefs about life after death. Which of the following statements is closest to your own beliefs?” continued

- Those that regularly attended a Christian church as an adult are more likely to select “After you die you will go to Heaven because you have received Jesus Christ as your savior” (37% v. 12%)
- Those that regularly attended a Christian church as an adult are less likely to select “No one really knows what will happen after we die” (24% v. 41%)
“Which if any of the following reasons describe why you stopped attending regularly?”

I personally had a negative experience with people at church
  • Those in the South (22%) are more likely to select than those in the Northeast (12%)
  • African-Americans (23%) and Whites (21%) are more likely to select than Hispanics (9%)
  • Other Religions (30%) are the more likely to select than Christians (17%)

I lost interest
  • Those age 65+ (30%) are more likely to select than those 35-44 (20%) and 45-54 (18%)
  • Hispanics (26%) are more likely to select than Asian-Americans (10%)
  • Those with a Bachelor’s degree (30%) are more likely to select than those who are high school graduates or less (20%)
  • Those with household income of $75,000-99,999 (28%) are more likely to select than those with less than $25,000 (18%)
  • Those who are in a civil union/domestic partnership (32%) are more likely to select than those who are married (21%)
“Which if any of the following reasons describe why you stopped attending regularly?”

I lost interest  (continued)
- Nonreligious (33%) are the more likely to select than Christians (19%)
- Catholics (25%) are more likely to select than Protestants (14%)
- Self-identified Evangelicals are less likely to select (4% v. 24%)
- Those that regularly attended a Christian church as a child are more likely to select (25% v. 14%)

I moved away from the church I had attended
- Those who are married (22%) are more likely to select than those who are widowed (11%)
- Christians (23%) are more likely to select than Nonreligious (12%)
- Protestants (29%) are more likely to select than Catholics (16%)
“Which if any of the following reasons describe why you stopped attending regularly?”

I had only attended because my parents made me

- Those age 18-24 (35%) are more likely to select than those 45-54 (22%), 55-64 (20%), and 65+ (21%)
- Hispanics are the most likely to select (32%)
- Those with household income of $35,000-49,999 (31%) are more likely to select than those with less than $25,000 (20%) and $75,000-99,999 (20%)
- Those who are single, never married (33%) are more likely to select than those who are married (22%), divorced/separated (23%), or widowed (15%)
- Christians are the least likely to select (19%)
- Self-identified Evangelicals are less likely to select (7% v. 27%)
- Those that regularly attended a Christian church as a child are more likely to select (30% v. 4%)
- Those that regularly attended a Christian church as an adult are less likely to select (9% v. 32%)
“Which if any of the following reasons describe why you stopped attending regularly?”

I lost trust in the church
- Asian-Americans are the least likely to select (3%)
- Those who are high school graduates or less are the least likely to select (13%)
- Those with household income of $100,000 or more (27%) are more likely to select than those with less than $25,000 (17%)
- Those who are widowed are the least likely to select (7%)
- Christians are the least likely to select (16%)
- Those that regularly attended a Christian church as a teen are more likely to select (26% v. 15%)

I lost trust in God
- No significant differences
“Which if any of the following reasons describe why you stopped attending regularly?”

I got too busy in my life

- Those age 18-24 (26%) are more likely to select than those 65+ (14%)
- Those with household income of $100,000 or more (26%) are more likely to select than those with less than $25,000 (17%) and $35,000-49,999 (15%)
- Those who are single, never married (22%) or divorced/separated (20%) are more likely to select than those who are widowed (10%)
- Christians (23%) are more likely to select than Nonreligious (12%)
“Which if any of the following reasons describe why you stopped attending regularly?”

I was turned off by the moral stances of the church

- Those age 65+ (25%) are more likely to select than those 18-24 (15%)
- Those who are high school graduates or less are the least likely to select (12%), followed by those with some college (24%)
- Those with household income of $50,000-74,999 (28%), $75,000-99,999 (24%), and $100,000 or more (29%) are more likely to select than those with less than $25,000 (12%) and $25,000-34,999 (15%)
- Those who are married (24%) are more likely to select than those who are widowed (12%)
- Christians are the least likely to select (14%)
- Self-identified Evangelicals are less likely to select (5% v. 22%)
- Those that regularly attended a Christian church as a child are more likely to select (23% v. 11%)
“Which if any of the following reasons describe why you stopped attending regularly?”

I made life choices that would not be supported by a church

- Those who are in a civil union/domestic partnership (21%) are more likely to select than those who are married (10%) or divorced/separated (10%)
- Christians are the least likely to select (9%)
- Self-identified Evangelicals are less likely to select (1% v. 12%)
