

Evangelical and Non-evangelical Voting & Views of Politics in America – Part 1

Survey of 3,000 Americans

For the Billy Graham Center, Wheaton College

Methodology

- ❑ The study was sponsored by the Billy Graham Center at Wheaton College
- ❑ The online survey of Americans was conducted May 9-16, 2018
- ❑ The completed sample is 3,000 surveys
- ❑ A minimum of 1,000 respondents were screened for each of three groups (those qualifying for both evangelical groups are included in the reporting for both):
 - ❑ 1,000 Americans who are not evangelicals (**NonEV** do not have evangelical beliefs nor self-identify as evangelical or born again)
 - ❑ 1,064 Americans who have evangelical beliefs (**EVB**)
 - ❑ 1,814 Americans who self-identify as an evangelical or born again Christian (**SI**)

Methodology

- ❑ Slight weights were used for each group to balance gender, age, region, ethnicity, and education
- ❑ The sample provides 95% confidence that the sampling error from the online panel does not exceed $\pm 3.2\%$ for non-evangelicals, $\pm 3.1\%$ for those with evangelical beliefs, and $\pm 2.4\%$ for self-identified evangelicals (These margins of error account for the effect of weighting)
- ❑ Margins of error are higher in sub-groups

Evangelical Beliefs

- ❑ Evangelical Beliefs are defined using the NAE LifeWay Research Evangelical Beliefs Research Definition based on respondent beliefs
- ❑ Respondents are asked their level of agreement with four separate statements using a four-point, forced choice scale (strongly agree, somewhat agree, somewhat disagree, strongly disagree). Those who strongly agree with all four statements are categorized as having Evangelical Beliefs
 - The Bible is the highest authority for what I believe
 - It is very important for me personally to encourage non-Christians to trust Jesus Christ as their Savior
 - Jesus Christ's death on the cross is the only sacrifice that could remove the penalty of my sin
 - Only those who trust in Jesus Christ alone as their Savior receive God's free gift of eternal salvation

Survey Responses

58% of evangelicals by belief and 53% of self-identified evangelicals voted for Trump

Among Those Who Voted in 2016

Very few votes went to third party candidates

Among Non-Evangelicals

Significant Differences

Region
Age
Gender
Education Level
Ethnicity
Location of Residence
Marital Status
Household Income
Christian Church Service Attendance
Faith Preference
Political Affiliation

Significant Statistical Differences

Comparisons were made to determine if there are any significant statistical differences among region of the country, age, gender, and education level.

Region	Age	Gender	Education Level
Northeast	18-34	Male	High school graduate or less
Midwest	35-49	Female	Some college
South	50-64		Bachelor's degree
West	65+		Graduate degree

Significant Statistical Differences

Comparisons were made to determine if there are any significant statistical differences among ethnicity, location of residence, marital status, and household income.

Ethnicity	Location of Residence	Marital Status	Household Income
White	Large city (100,000+)	Married	Less than \$35,000
African-American	Small City (<100,000)	Single, never married	\$35,000-\$74,999
Hispanic	Suburbs	Divorced/ Separated	\$75,000 or more
Other Ethnicities	Rural Area	Widowed	

Significant Statistical Differences

Comparisons were made to determine if there are any significant statistical differences among Christian church service, faith preference, and political affiliation .

Christian church service Attendance	Faith Preference	Political Affiliation
At least once a month	Catholic	Democratic
Less than once a month	Protestant/ Non-denominational	Republican
	Other Religions	Independent
	Non-religious	

“In the 2016 presidential election, for whom did you vote?”

Evangelicals by Belief

- Those in the Northeast (50%) are the most likely to select “Hillary Clinton” (50%)
- Those in the South (59%) and West (62%) are more likely to select “Donald Trump” than those in the Northeast (46%)
